

Face Mask Policy

All Urology Austin patients, staff, providers and visitors must wear a face mask **at all times** while in our offices. This includes patients waiting for their providers **while in patient rooms**.

Viral particles introduced into the air we breathe are so minute in size that they can pose a risk even with masks. Masks at least reduce the potential for breathing them in, **but it requires full coverage of the mouth and nose, and no removal while waiting to be seen by your provider.**

Face masks are only effective when worn properly and at all times. A face mask must fully cover your nose and mouth to protect yourself and those around you.

Thank you for your cooperation and adherence to our face mask policy.
